DELTA fläche – Surface Mounting

In garages, laundry rooms, laboratories and workshops, you need to stay on your toes - or you may get them wet once in a while – not to mention the floors and walls. This is why it is essential to ensure protection of electrical installations in damp/wet areas or outdoors. A clear case for the DELTA fläche IP44

product range (splash-proof) for damp locations, the DELTA fläche IP55 (jet-proof) for tough environments or the DELTA fläche IP68 (pressure-water-tight) for extreme conditions.

DELTA fläche – surface mounting

The enclosures and covers are made of fire-retarding polycar-
bonate, which are extremely high-impact and designed for the
most harsh conditions, both in the heat and the cold.

And if it's not too damp, then just use the DELTA fläche IP20.

DELTA fläche –
Surface Mounting

Universal switch
IP20

Heating emergency switch with pilot lamp
IP55

Switch with pilot lamp
IP44

Universal switch
IP44

Heizung
Notschalter

Discontinued model

Combination of switch with pilot lamp and (SCHUKO) outlet
IP55/IP44
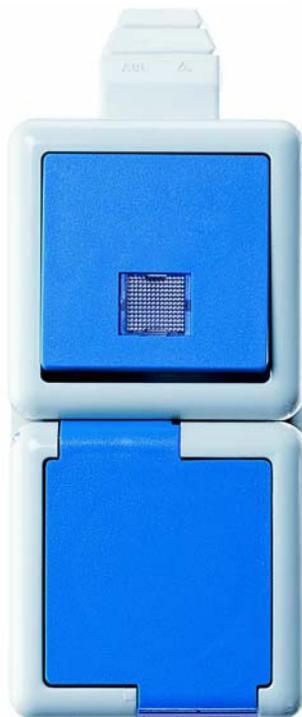

(SCHUKO) wall outlet with lid
IP68

Discontinued model

Components of the surface mounting product range:

- Rocker switches

- Enclosures made of high-impact thermoplastic

- (SCHUKO) outlet

- Four models from the surface mounting product range:
  – IP20 (ordinary switch version)
  – IP44 (splash-proof version)
  – IP55 (jet-proof version)
  – IP68 (pressure-water-tight version)

DELTA fläche - Surface Mounting
DELTA fläche IP20

■ Overview

Clean cut

No more cap breakages when opening the four optional cable entries: this is because they are cut and not broken – the cap wall can be cut because the material (thermoplastic) is sufficiently thin.

Quick assembly

The cover has a timesaving snap-on lock, which can be secured with a screw (W 2.9 x 16/7) if required.

Simple connection

The large distance between insert and cover, due to the small base, facilitates cable routing and connection. The fixing dimensions for the insert are marked in the cover. The outer conductor connection is marked with P and has an orange release lever. The pilot/orientation light is also simple to retrofit.

Switches and pushbuttons

Introduction

Overview

Light signal

SCHUKO outlets

Two-circuit switch

Garages, laundry rooms, laboratories and workshops are often exposed to a lot of heavy-duty activity, which includes the odd splash here and there. This means that it's essential to ensure that the electrical installation gets the right degree of protection. That's when you need the splash-proof, surface mounting DELTA fläche IP44 product range with the large operator interface that takes rough treatment in its stride.

DELTA fläche IP44 – keeping electrical installations "high and dry".

Attractive design

Generous switch rockers, contrasting switch plates, useful combinations: the DELTA product range has an impressively appealing design. This was also confirmed by the jury for the special exhibition "Die gute Industrieform".

Increased safety

The switch enclosures are made of durable, high-impact molded plastic, which is also able to withstand high mechanical loads.

The terminals are insulated against voltage contact. Molded plastic pressure plates serve to release the conductor.
All the edges of the inserts are rounded off – thus preventing damage to the conductor insulation.

A hinged lid on the SCHUKO outlet prevents the ingress of moisture. The outlet inserts are equipped with connecting terminals in compliance with DIN VDE 0620, which have proven themselves in the field for many years.

Simple operation

Easy-to-use flat rockers – now available in the splash-proof DELTA fläche product range.

• Durable, high-impact thermoplastic enclosure.

• Screwless terminals for switch and outlet inserts.

• Insulated reset levers ensure protection against contact.

• Easy conductor releases at a touch of a pushbutton, no tools required.

All terminals are double terminals.

Simple installation

The DELTA fläche product range has been thought through down to the very last detail: the switch plates of the SCHUKO outlets and the switches and pushbuttons are screwed onto the lower part with two non-rusting screws. At the back of the switches, pushbuttons and outlets are two diagonal 4.5 mm drill holes for slot mounting. Slide nipples facilitate cable entry. All switches and pushbuttons can be equipped with glow lamps in three brightness levels. The multiple combinations of the SCHUKO outlets are supplied completely wired. Combination switch and SCHUKO outlet units are also available.

A complete range of two-way switches, switches with pilot lamp, pushbuttons, light signals, SCHUKO outlets and double and triple combinations of devices are available.
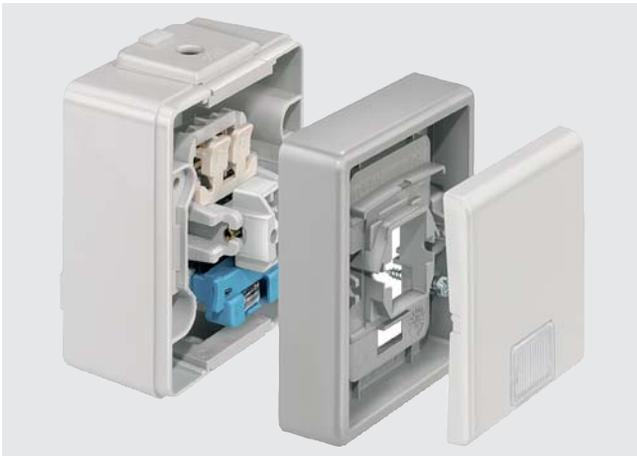

DIN VDE and DIN-compliant technology

The switches and pushbuttons of the splash-proof DELTA fläche product range are manufactured in compliance with DIN VDE 0632 and DIN 49 200, the outlets with DIN VDE 0620 and DIN 49 440. All bear the VDE mark of conformity. The devices offer IP44 degree of protection and are splash-proof. The switches and pushbuttons can be used up to 10 A and 250 V AC, the SCHUKO outlets up to 16 A 250 V AC and 10 A 250 V DC.

■ Overview

Two-circuit switch

Emergency stop pushbutton

Switch with pilot lamp

Built to last

Enclosures and covers are extremely high-impact, designed for the most rigorous demands in the heat or cold. The material: fire-retarding polycarbonate. The durability of the product range is tried and tested in daily applications – from car workshops to iron and steel works.

If you're often "up to your neck" in water

All switches and pushbuttons of the DELTA fläche IP55 product range are jet-proof – degree of protection IP55. They take a fierce water jet in their stride. And the splash-proof outlets (IP44) are also pretty hard to beat.

In top form

Doesn't just mean looking good with the IP55 fläche product range: e.g. large-area control elements, which are even easy to operate with gloves on. The fact that the IP55 fläche product range with its brilliant blue covers also looks great is just an added bonus.

The IP55 fläche product range is ideal anywhere

The vast number of individual functions means it can be used universally.

This is further enhanced by the unlimited combination options of the product range elements with identical enclosure dimensions. Whether for industry, on building sites or subway construction sites – you will find many uses for the IP55 fläche product range.

Freedom of movement at work

The IP55 fläche product range also offers plenty of wiring space. Thus allowing fast installation. User-friendly, timesaving and therefore cost-effective.
