1) **cFLus** max. 600 V.

2) For other ratings up to 400 kVA see the interactive Catalog CA 01 and the A&D Mall.

3) Operating with 380 V AC three-phase at the input terminals results in an output voltage of 220 V AC three-phase.

4) For more information see the interactive Catalog CA 01 and the A&D Mall.

Transformers

Introduction

Options

Delivery time class DT

The delivery time classes are specified in the selection tables in front of the order numbers.

The standard transport time for Germany is 1 day (see "Explanations" on page 4).

► Preferred type

This delivery time class applies with the degree of protection IP00, i.e. these units can be supplied immediately from stock¹⁾ and will be dispatched within 24 hours. The transport times depend on the destination and the mode of delivery.

For the IP20, IP23 and IP54 degrees of protection, standard rail mounting and Cage Clamp terminals, as well as further options, see delivery time classes B and C.

Delivery time class A

The ordered units will be dispatched within 2 working days.

Delivery time classes B and C

Express service for IP00, IP20, IP23 and IP54 degree of protection, standard rail mounting and Cage Clamp terminals as well as for additional options, i.e. these units are not stock items. These delivery time classes are dependent on the order quantities.

Delivery time class B is applicable to an order quantity up to 5 units. The ordered units will be dispatched within 1 week.

For 6 units and more, delivery time class C is applicable, the ordered units will be dispatched within 3 weeks.

Delivery class D

The ordered units, including enclosure and additional options, will be dispatched within 6 weeks.

1) This is based on commercially available orders – normal order!

Orders for transformers with selectable voltages and magnetic voltage regulators with selectable input and output voltages

Please send your selection by e-mail with the basic Order No. and the required options specified in plain text to:

MD_Anfrage@brmr.siemens.de

or by fax to: +49 (0)421/5125 333.

In response you will receive the complete Order No. for completing your order.

Ordering transformers in customized designs or with special applications

Inquiries for customized transformers not found in our catalog, for example:

- Toroidal-core transformers
- Associated transformers
- Medium-frequency transformers
- Transformers for converter applications
- Special transformers for rail vehicles
- Special transformers for marine applications and container cranes (option: Vibration-resistant, low-noise version able only in enclosure)

- Special transformers according to DIN EN 60601-1 (VDE 0750) for medical equipment
- High-reactance transformers
- 4CH, 4CP, 4CJ and 4CQ toroidal-core variable-ratio and pillar-type variable ratio transformers (see the interactive Catalog CA 01 and Mall)

should be sent by e-mail to:

MD_Anfrage@brmr.siemens.de

or by fax to: +49 (0)421/5125 333.

In reply, you will receive the complete Order No. which should be quoted in your order.

More information

More information about transformers, power supplies, fans, chokes and filters can be found on the Internet at

<http://www.siemens.com/sidac>.

For products and information on

- chokes and filters, see Catalog LV 60, Order No.: E86060-K2803-A101-A3
- 2CC and 2CQ axial fans, see Catalog LV 65, Order No.: E86060-K1865-A101-A1

Transformers for Siemens converters can be found in the following catalogs:

Catalog NC 60, SINUMERIK & SIMODRIVE
Order No.: E86060-K4460-A101-B1

Catalog DA 65.10, SIMOVERT MASTERDRIVES Vector Control
Order No.: E86060-K5165-A101-A3

Catalog DA 65.11, SIMOVERT MASTERDRIVES Motion Control
Order No.: E86060-K5165-A111-A3

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

General data

Overview

4AM../4AT.. transformers

With the right transformer, the right voltage will be available whatever the conditions.

Our transformers are the right choice for each application: They work reliably, safely and worldwide under a wide range of different conditions.

The transformers are configured in user-friendly combinations as isolation, control and line transformers according to EN 61558-2-4, -2-2, -2-1, or as safety, control and line transformers according to EN 61558-2-6, -2-2, -2-1, or as autotransformers according to EN 61558-2-13 with selectable input and output voltages.

Note: Mains transformers with ≤ 50 V on the output side are, in the case of SIRIUS transformers, always designed as safety transformers.

Our transformers provide optimal protection through high permissible ambient temperatures up to 40 °C or 55 °C, a high short-time rating in the case of control transformers, fuseless construction and due to its safety standard "Safety inside" EN 61558.

Benefits

- High short-time rating of the SIRIUS transformers: Lower transformer rated power for a large number of contactors
- PC program ASIST as configuring aid: Fast, optimum selection of the right control transformer
- Suitable for "fuseless construction": The small inrush current means that "circuit-breakers for motor protection" can also be used on the primary side
- **cULus** approvals for the USA and Canada: Can be used worldwide without any problems
- Comprehensive type spectrum supplied from stock: Rapid availability

Application

In industrial machines, process engineering, heating and air-conditioning equipment, etc., for supplying control and signaling circuits, when:

- Several electromagnetic loads (e.g. contactors) have to be controlled
- Control and signaling devices are used outside the control cabinet
- The operating voltage for the loads differs from the available voltage level
- Voltage matching for machines and installations with galvanic isolation or as an autotransformer

Generally for voltage matching of electrical appliances, e.g. in communications, medical engineering and domestic appliances.

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM safety (mains transformers) and control transformers

Overview

- According to EN 61558-2-6, -2-1, -2-2
- CE, cULus
- $t_a = 40\text{ °C/B}$
- AC 50/60 Hz
- IP00, IP23 and IP54 degree of protection

4AM with screw-type/tab terminals (figure on the left) and with Cage Clamp terminals (figure on the right)

1) For p.f. = 0.5 and $U_2 = 0.95 \times U_{2N}$.

2) The delivery time class B depends on the quantity.

3) For types 4AM32 to 4AM40, standard rail mounting is integrated in the standard version.

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM safety transformers (mains transformers)

Overview

- According to EN 61558-2-6, -2-1
- CE, cULus
- $t_a = 40\text{ °C/B}$
- AC 50/60 Hz
- Degree of protection IP00, IP23 and IP54

4AM with screw-type/tab terminals (figure on the left) and with Cage Clamp terminals (figure on the right)

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM, 4AT isolation, control and mains transformers

Overview

- According to EN 61558-2-4, -2-2, -2-1
- CE, cULus¹⁾
- 4AM: $t_a = 40\text{ °C/B}$, 4AT: $t_a = 55\text{ °C/H}$
- AC 50/60 Hz
- Degree of protection IP00, IP23 and IP54

4AM with screw-type/tab terminals (figure on the left) and 4AT with screw-type terminals (figure on the right)

1) cULus approvals for voltages $\leq 600\text{ V}$ (incl. tappings).

Selection and ordering data

With one input voltage

Rated input voltage $U_{1N} 230\text{ V} \pm 5\%$,
rated output voltage $U_{2N} 110\text{ V}$

Degrees of protection IP23 and IP54, see page 10/25.

1) For p.f. = 0.5 and $U_2 = 0.95 \times U_{2N}$.

2) The delivery time class B depends on the quantity.

3) The 4AT types are only supplied with screw-type terminals.

4) For types 4AM32 to 4AM40, standard rail mounting is integrated in the standard version.

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM, 4AT isolation, control and mains transformers

With one input voltage

Rated input voltage U_{1N} 230 V \pm 5 %,

rated output voltage U_{2N} 110 V

1) For p.f. = 0.5 and $U_2 = 0.95 \times U_{2N}$.

2) The delivery time class B depends on the quantity.

3) The 4AT types are only supplied with screw-type terminals.

4) For types 4AM32 to 4AM40, standard rail mounting is integrated in the standard version.

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM, 4AT isolation, control and mains transformers

With one input voltage

Rated input voltage U_{1N} 400 V \pm 5 %,
rated output voltage U_{2N} 110 V

PU (UNIT, SET, M)= 1
PS = 1 UNIT (You can order this quantity or a multiple thereof.)
PG = 104

1) For p.f. = 0.5 and $U_2 = 0.95 \times U_{2N}$.

2) The delivery time class B depends on the quantity.

3) The 4AT types are only supplied with screw-type terminals.

4) For types 4AM32 to 4AM40, standard rail mounting is integrated in the standard version.

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM, 4AT isolation, control and mains transformers

With one input voltage

Rated input voltage $U_{1N} 500 V \pm 5 \%$,
rated output voltage $U_{2N} 110 V$

PU (UNIT, SET, M)= 1
PS = 1 UNIT (You can order this quantity or a multiple thereof.)
PG = 104

1) For p.f. = 0.5 and $U_2 = 0.95 \times U_{2N}$.

2) The delivery time class B depends on the quantity.

3) The 4AT types are only supplied with screw-type terminals.

4) For types 4AM32 to 4AM40, standard rail mounting is integrated in the standard version.

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM isolation and mains transformers

Overview

- According to EN 61558-2-4, -2-1
- CE, cULus¹⁾
- $t_a = 40\text{ °C/B}$
- AC 50/60 Hz
- IP00, IP23 and IP54 degree of protection

4AM with screw-type/tab terminals (figure on the left) and with Cage Clamp terminals (figure on the right)

1) cULus approvals for voltages $\leq 600\text{ V}$ (incl. tappings) and degree of protection IP00.

Selection and ordering data

With one input voltage

Rated input voltage $U_{1N} 230\text{ V} \pm 5\%$,
rated output voltage $U_{2N} 110\text{ V}$

Single-Phase Transformers

4AM, 4AT Safety, Isolation, Control and Mains Transformers

4AM, 4AT transformers
with selectable voltages

Overview

- 4AM and 4AT transformers designed as isolation, control and mains transformers according to EN 61558-2-4, -2-2, -2-1 or safety, control and mains transformers according to EN 61558-2-6, -2-2, -2-1 or autotransformers according to EN 61558-2-13 with selectable input and output voltages in the power range from 0.025 kVA to 16 kVA (for autotransformers = type rating) and additional options
- CE, cULus¹⁾
- 4AM: $t_a = 40$ °C/B, 4AT: $t_a = 55$ °C/H
- Standard vector group: li0, for autotransformer: la0

4AM (figure on the left) and 4AT30 3 to 4AT43 2 (figure on the right)

1) The enclosures for the 4AM23 4 to 4AT43 2 transformers are cULus approved.

1) Exception: The enclosure for the 4AT45 0 transformers is not cULus approved.

2) For autotransformers = type rating.

Options

- Cage Clamp terminal; up to 24 V, without additional price
- Fuse terminal
Device protection fuses for secondary-side short-circuit and overload protection with rated currents ≤ 6.3 A and a rated voltage of max. 440 V AC can be mounted on the 4AM transformers; screw-type or Cage Clamp terminals possible.
Additional price € 4.80
- Rating plates made of metal
One separately packed rating plate made of metal can be supplied per 4AM and 4AT transformer.
Additional price € 15.—
- Deviations from the standard vector groups li0 or la0 for autotransformers must be specified when ordering.

Single-Phase Transformers

4BT Power Transformers

General data

Overview

4BT.. transformers

With the right transformer, the right voltage will be available whatever the conditions.

Our transformers are the right choice for each application: They work reliably, safely and worldwide under a wide range of different conditions.

The 4BT single-phase power transformers can be configured as matching, auto- or converter transformers according to DIN VDE 0532-6 with selectable input and output voltages.

Our transformers provide optimal protection through high permissible ambient temperatures up to 55 °C.

Benefits

- **UL** approvals for the USA and Canada: Can be used worldwide without any problems
- Comprehensive type spectrum: Rapid availability

Application

4BT single-phase power transformers are implemented in industrial and building systems and control and distribution and are used to adapt the locally available line voltage to the operational voltage of the system or its subsystems. They also limit the possible short-circuit currents.

Power transformers with galvanic isolation or designed as *autotransformers* are used for adapting machines and systems to the local voltages that are available at the installation site.

Furthermore *power transformers* can be used with electrical appliances, for example in communications, medical engineering and domestic appliances. In drive systems, special *converter transformers* are used for voltage matching and *autotransformers* are used with infeed/regenerative feedback modules.

Single-Phase Transformers

4BT Power Transformers

4BT transformers with selectable voltages

Overview

- 4BT transformers designed as matching, auto-¹⁾ or converter transformers according to DIN VDE 0532-6 with selectable input and output voltages in the power range from 18 kVA to 250 kVA from 100 V to 1000 V and additional options
- **CE**, **cULus**²⁾
- $t_a = 55$ °C/H
- Standard vector group: li0, for autotransformer: la0

1) For autotransformers = type rating.

2) **cULus** approvals for voltages ≤ 600 V (incl. tappings) and degree of protection IP00.

Further designs with higher outputs up to 1250 kVA are available on request.

Single-Phase Transformers

4AX22, 4AX23 Safety Transformers

Resin-enclosed

Overview

4AX22 12 (figure on the left) and 4AX22 14 (figure on the right)

4AX23 11

The 4AX22 and 4AX23 safety transformers are completely resin-enclosed.

- Safety class II (for other safety transformers, see [Safety, Isolation, Control and Mains transformers](#))
- Vector group II0
- Conditionally short-circuit proof
- $t_a = 40\text{ °C/E}$

4AX22 portable version

- Highly rugged
- Degree of protection IP44
- EN 61558-2-9
- CE, , , , 

4AX23 stationary version

- Degree of protection IP65
- EN 61558-2-6
- CE, , 

Application

Safety transformers are used in applications in which protective measures for safety extra-low voltage are necessary.

The electrical loads used must comply with protection class III.

4AX22 portable version

Application areas: Handheld lamps, electrical tools

4AX23 stationary version

Application areas: Swimming pools, wet grinding machines, electrical tools.

Single-Phase Transformers

4AX24 Isolation Transformers

Resin-enclosed

Overview

4AX24 13

The 4AX24 portable isolation transformers are completely resin-enclosed.

- EN 61558-2-4
-
- $t_a = 40 \text{ °C/E}$
- Degree of protection IP44
- Safety class II (for other safety transformers, see [safety, isolation, control and mains transformers](#))
- Vector group li0
- Conditionally short-circuit proof

Application

Isolation transformers are used in applications in which protective isolation is necessary.

Application areas: test bays, laboratories, workshops, electrical tools.

Single-Phase Transformers

4AT Isolation Transformers

For the supply of medical premises

Overview

- According to EN 61558-2-15
- Safety class I
- With static shield between the primary and secondary winding with insulated connection
- With thermistor transformer protection for warning of thermal overload¹⁾
- With central tap for insulation monitoring
- Short-circuit voltage $u_z \leq 3\%$
- No-load supply current $i_0 \leq 3\%$, max. inrush current $12 \times I_{1N}$

4AT special design for medical premises

1) 3RN tripping units for PTC sensors must be ordered separately, see the Chapter "Monitoring and Control Devices".

Single-Phase Transformers

4FL, 4FK Voltage Regulators

4FL voltage regulators, transformer-type

Overview

4FL

- According to DIN VDE 0660 Part 500
- Degree of protection, IP21
- **CE**
- $t_a = 40\text{ °C/E}$

Application

The 4FL transformer-type voltage regulators are used as voltage stabilizers on supply systems with varying voltages. On the output of the voltage regulator, a constant voltage is available for the load which creates a constant machine performance which is immune to variations in the supply system.

Selection and ordering data

Rated voltage: PRI = SEC: 230 V, 50 Hz to 60 Hz

Single-Phase Transformers 4FL, 4FK Voltage Regulators

4FK voltage regulators, magnetic type

Overview

4FK31 to 4FK34 (figure on the left) and 4FK35 to 4FK38 (figure on the right)

- According to DIN VDE 61558-2-12
- With sinusoidal output voltage
- Settling time 40 ms
- **CE**
- $t_a = 40\text{ °C}$

Application

The 4FK magnetic-type voltage regulators are used for loads that are supplied with AC voltage and that are particularly sensitive to voltage variations.

1) The delivery time class B depends on the quantity.

2) The Order No. stem is completed to the full order number when placing an order ([enquiries/ordering address](#), see Page 10/4).

3) The units in the output range 3.15 kVA to 10 kVA have an additional connection for p.f. = 0.8.

4) Adjustment for only one p.f. value of 1 to 0.5 is possible.

Three-Phase Transformers

4AP, 4AU Safety, Isolation, Control and Mains Transformers

General data

Overview

4AP./4AU.. transformers

With the right transformer, the right voltage will be available at any conditions.

Our transformers are the right choice for each application: They work reliably, safely and worldwide under a wide range of different conditions.

The transformers are configured in user-friendly combinations as isolation, control and line transformers according to EN 61558-2-4, -2-2, -2-1, or as safety, control and line transformers according to EN 61558-2-6, -2-2, -2-1, or as autotransformers according to EN 61558-2-13 with selectable input and output voltages.

Note: Mains transformers with ≤ 50 V on the output side are, in the case of SIRIUS transformers, always designed as safety transformers.

Our transformers provide optimal protection through high permissible ambient temperatures up to 40 °C or 55 °C, a high short-time rating in the case of control transformers, fuseless construction and due to its safety standard "Safety inside" EN 61558.

Benefits

- High short-time rating of the SIRIUS transformers: Lower transformer rated power for a large number of contactors
- Suitable for "fuseless construction": The small inrush current means that "circuit-breakers for motor protection" can also be used on the primary side
- UL approvals for the USA and Canada: Can be used worldwide without any problems
- Comprehensive type spectrum supplied from stock: Rapid availability

Application

In industrial machines, process engineering, heating and air-conditioning equipment, etc., for supplying control and signaling circuits, when:

- Several electromagnetic loads (e.g. contactors) have to be controlled
- Control and signaling units are used outside the control cabinet
- The operating voltage for the loads differs from the available voltage level
- Voltage matching for machines and installations with galvanic isolation or as an autotransformer

Generally for voltage matching of electrical appliances, e.g. in communications, medical engineering and domestic appliances.

Three-Phase Transformers

4AP, 4AU Safety, Isolation, Control and Mains Transformers

4AP, 4AU isolation, control and mains transformers

Overview

- According to EN 61558-2-4, -2-2, -2-1
- **CE, cULus**
- 4AP: $t_a = 40$ °C/B, 4AU: $t_a = 55$ °C/H
- AC 50/60 Hz
- Degree of protection IP00, IP23 and IP54

1) For autotransformers = type rating.

Please inquire about other transformer enclosures.

Options

- Rating plates made of metal
One separately packed rating plate made of metal can be supplied per 4AP transformer.

Additional price € 15.—

- Deviations from the standard vector groups Dyn5 or Ya0 for autotransformers must be specified when ordering.

Three-Phase Transformers

4BU Power Transformers

General data

Overview

4BU.. transformers

With the right transformer, the right voltage will be available at any conditions.

Our transformers are the right choice for each application: They work reliably, safely and worldwide under a wide range of different conditions.

4BU three-phase power transformers

- are available as matching transformers with one input/output voltage according to DIN VDE 0532-6
- and can be configured as matching, auto- or converter transformers according to DIN VDE 0532-6 with selectable input and output voltages.

Our transformers provide optimal protection through high permissible ambient temperatures up to 40 °C or 55 °C.

Benefits

- **cULus** approvals for the USA and Canada: Can be used worldwide without any problems
- Comprehensive type spectrum: Rapid availability

Application

4BU three-phase power transformers are implemented in industrial and building systems and control and distribution and are used to adapt the locally available line voltage to the operational voltage of the system or its subsystems. They also limit the possible short-circuit currents.

Power transformers with galvanic isolation or designed as *autotransformers* are used for adapting machines and systems to the local voltages that are available at the installation site.

Furthermore *power transformers* can be used with electrical appliances, for example in communications, medical engineering and domestic appliances. In drive systems, special *converter transformers* are used for voltage matching and *autotransformers* are used with infeed/regenerative feedback modules.

Three-Phase Transformers

4BU Power Transformers

4BU matching transformers
with cURus approval

Overview

- DIN VDE 0532-6
- AC 50/60 Hz
- Δ or Y (see selection and ordering data)
- CE, cURus
- $t_a = 40$ °C/H or $t_a = 55$ °C/H (see selection and ordering data)
- Degree of protection IP00

4BU

Selection and ordering data

With one input voltage

Rated input voltage

U_{1N} 3 AC 400 V, 400 V \pm 5 %,
rated output voltage U_{2N} 3 AC Y 208 V,
 $t_a = 40$ °C/H

Three-Phase Transformers

4BU Power Transformers

4BU transformers with selectable voltages

Overview

- 4BU power transformers and 4BU power transformers with **CE, cULus** approval designed as matching, auto-¹⁾ or converter transformers with selectable input and output voltages from 100 V to 1000 V (line-to-line-voltage U_L) Υ or Δ in the power range from 18 kVA to 400 kVA and additional options
- DIN VDE 0532-6
- **CE, cULus**²⁾ (see Selection and ordering data)
- $t_a = 40$ °C/H and optional $t_a = 55$ °C/H
- Standard vector group: Dyn5, for autotransformer: Ya0

4BU

1) For autotransformers = type rating.

2) **cULus** approvals for voltages ≤ 600 V (incl. tappings) and degree of protection IP00.

Options

- Thermistor transformer protection for warning and/or shutdown, see [Technical Information LV 1 T "General Data; Design"](#).

For transformer Type	PG = 104 Additional price for		
	Warning	Shutdown	Warning and shutdown
4BU			

- Rating plates made of metal
One separately packed rating plate made of metal can be supplied per 4BU transformer.
Additional price € 15.—

- Deviations from the standard vector groups Dyn5 or Ya0 for autotransformers must be specified when ordering.

Further designs with higher outputs up to 1250 kVA are available on request.

Three-Phase Transformers

4AP, 4AU Autotransformers

For matching purposes according to EN 61558-2-13

Overview

- Shared input and output windings without electrical isolation
- Enable the voltage matching of electrical loads
- Designed for continuous operation (100 % duty ratio)
- Vector group YNa0
- 4AP: $t_a = 50 \text{ }^\circ\text{C}$ (T50/B), 4AU: $t_a = 55 \text{ }^\circ\text{C}$ (T55/H)
- CE, cULus

4AP (figure on the left) and 4AU (figure on the right)

1) Operating with 380 V AC three-phase at the input terminals results in an output voltage of 220 V AC three-phase.

2) The delivery time class B depends on the quantity.

Three-Phase Transformers

4FL Voltage Regulators

4FL voltage regulators, transformer-type

Overview

4FL

- According to DIN EN 60439-1
- Degree of protection IP21
- CE
- $t_a = 40\text{ °C/E}$

Application

The 4FL transformer-type voltage regulators are used as voltage stabilizers on supply systems with varying voltages. On the output of the voltage regulator, a constant voltage is available for the load which creates a constant machine performance which is immune to variations in the supply system.

Selection and ordering data

Rated voltage: PRI = SEC: 400 V, 50 Hz to 60 Hz

PU (UNIT, SET, M)= 1
 PS = 1 UNIT (You can order this quantity or a multiple thereof.)
 PG = 114
